

December 6, 2018

## System Enhancement Schedule (Update)

As announced previously, the UAT environment will be ready for user testing starting from Dec 17, 2018. The ordering of new services in the UAT environment is now open for customers who would like to:

1. Receive FIX/Drop Copy messages with high precision timestamps
2. Migrate to Multicast Market Data from current TCP Market Data
3. Subscribe to Multicast Market Data (Binary)
4. Subscribe to Snapshot Recovery Service (ASCII or Binary)

For (1) above, customer please fill in the highlighted sections in the attached “CXJ request application form.docx” and send to [jp.market.operation@chi-x.com](mailto:jp.market.operation@chi-x.com).

For (2), (3), (4) above, customer is required to submit a signed order form. Please consult Client Service [jp.client.service@chi-x.com](mailto:jp.client.service@chi-x.com) for assistance. The submission cutoff date is Dec 12 if customer would like to start testing from Dec 17. Services ordered after Dec 12 will be available in the UAT environment from Jan 21, 2019 or later.

Please note that the above pertains to UAT environment only; ordering process for Production environment will be announced shortly.
