

System Enhancement Schedule

This is a notice to those who need to migrate to Multicast Market Data (the current TCP Market Data Feed subscribers), and those who wish to subscribe to the Multicast Market Data (Binary) or the Snapshot Recovery Service. The table below depicts the schedule for the availability of environments.

Environment	Product		2018				2019						
			Sep	Oct	Nov	Dec	Jan	Feb	Mar	Apr	May	Jun	
Simulation	Network	Lease Line											
		VPN											
	Market Data Service	Multicast ASCII (existing)											
		Multicast Binary (new)											
		Snapshot Recovery ASCII/Binary (new)											
Production	Network	Current 10G fibre port users											
		Other users											
	Market Data Service	Multicast ASCII (existing)											
		Multicast Binary (new)											
		Snapshot Recovery ASCII/Binary (new)											

	Available
	Unavailable
	Weekend Test

For those who do NOT use 10G port to access to Chi-X, please note that new circuit will be required for the migration to Multicast Market Data. The new circuit will be only available after December 2018.

Also, Payment Schedule will apply to any new products you need to subscribe to in relation to the migration. However, we understand that the migration might require the parallel run of old and new network and/or session IDs, thus any duplicated monthly Ports and IDs fees will be waived for up to 3 months.
